BAYKON
Industrial Weighing Systems

WEIGHBRIDGE SOFTWARE

POWERFUL PC SOFTWARE
MANNED OR UNMANNED

Baykon Weighbridge Software offers the perfect balance between simplicity and functionality.

FULLY CUSTOMISABLE WEIGHBRIDGE PC SOFTWARE

- Powerful Windows based Weighbridge Software
- User configurable - menus, databases, prompts, ticket formats
- Configurable reports with auto/manual exporting to Excel
- Networked multi-scale operation available
- Supports traffic lights, barriers, sensors, remote displays, card readers, ANPR and multiple IP cameras with "Live View"
- Customisable user access levels for security
- Supports Access & SQL databases. Direct connection to SQL server via Ethernet.

A simple, flexible setup and intuitive operation allows users to process transactions quickly and easily for fast vehicle throughput. The software's powerful reporting then allows all weighing data to be viewed, filtered, analysed and exported by authorised users as required.

The software is fully configurable with customisable user access levels, prompts, databases, printing, reports and indicator setup. Up to 8 customisable IDs can be recalled from lists or entered on the go. IDs such as Hauliers or Products can be linked to vehicles so they are automatically recalled when a registration is selected. Manned or Unmanned operation, traffic lights, card readers, sensors, barriers, ANPR & 3 IP cameras are supported as standard.
