

RESOLUTION

DIMENSIONING & SORTATION

GO & GO EXPRESS

Measure and weigh parcels of any shape in under a second.

SCAN ME

Available for purchase or hire.

WHAT MAKES IT UNIQUE?

- Ultra fast capturing of weights, dimensions, barcodes and images.
- Desktop or portable versions.
- Accurate static dimensioning.
- Designed for small-to-medium item sizes.

GLIDE & GLIDE EXPRESS

Uses light curtain technology to dimension and weigh cubic and irregularly shaped objects.

SCAN ME

Available for purchase or hire.

WHAT MAKES IT UNIQUE?

- Gliding light curtain design for measuring irregular shapes from 1cm up to 80cm.
- Portable around a warehouse.
- Static dimensioning, great for irregular shaped items.

PACE

Captures dimensions and weights of moving parcels on a conveyor line.

SCAN ME

WHAT MAKES IT UNIQUE?

- Semi-dynamic conveyor line - perfect for sites with limited space.
- Bridges the gap between manual workstations and full automation.
- Retrofit into existing conveyor lines.

HAWK

Utilises 3D imaging technology for quick, accurate dimensioning and weighing of pallets and freight.

SCAN ME

WHAT MAKES IT UNIQUE?

- Freestanding 3.6m high column with multi-camera array looking down from above.
- Designed to dimension pallets and large freight.
- Interfaces with weighing scale, touchscreen and barcode scanner.

RESOLUTION & BEEVISION DIMENSIONING & SORTATION

FLOW

Inline dimensioning, weighing, and scanning into one streamlined system.

SCAN ME

WHAT MAKES IT UNIQUE?

- Processes 2,000+ items per hour.
- Captures high resolution images.
- Use with BeeHive cloud-based dashboard for metrics and analytics.
- Routes and sorts parcels and packages when combined with BeeSort.

BEE SORT SORTATION

Modular sorting system designed to handle up to 4,000 items per hour.

SCAN ME

WHAT MAKES IT UNIQUE?

- Smooth, reliable sorting motion.
- Multidirectional roller ball sorter.
- Linear or loop conveyor designs based on space and flow.
- Add more chutes as your business grows.

BEE SORT HS

Smart item identification and multi-lane diverting, processing up to 14,000 parcels each hour.

SCAN ME

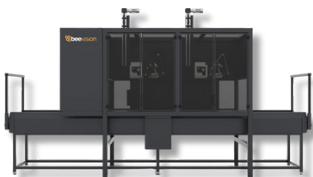

WHAT MAKES IT UNIQUE?

- Ultra fast in motion item processing.
- Tilt tray or cross belt conveyor.
- Auto routes each parcel to the correct lane or chute.

BEEVISION 400

Automates label application for parcels of different sizes and heights.

SCAN ME

WHAT MAKES IT UNIQUE?

- Prints and applies labels automatically.
- Accurate placement and label verification.
- Integrates with Resolution Flow.
